AI SCORING PIPELINE FOR EXECUTIVE SEARCH ON LOXO

Know who to call first, on every search.

Built for a Washington, DC search practice placing leaders in growth companies. Every candidate on your searches, scored against one clear scorecard and ranked inside Loxo, automatically. And your Claude, connected to Loxo, answering any question about your candidates in seconds. Your team decides.

PART 1 · AUTOMATIC

Weaver scoring

Scores, reasons and rank on every candidate card in Loxo.

PART 2 · ON DEMAND

Claude, connected to Loxo

Shortlists, call prep, client updates and database searches.

YOU ASKED

Your questions, answered

Everything you asked for is in. Here is how.

"Can we connect Loxo to ChatGPT or Claude?"

YES We set up Loxo's official connection in your Claude (it works with ChatGPT too). Your team asks in plain English and gets answers from your own Loxo.

"Does it see full work histories, notes and resumes?"

YES Weaver reads each candidate's work history, your team's notes and the resume text held in Loxo. We confirm it on your account during the full test.

"Can we pull every candidate on a search at once?"

YES Weaver reads the whole pipeline of a search, whether it holds 20 candidates or 100, and ranks them all.

"Can the AI's scores go back into Loxo?"

YES Every score lands on the candidate in Loxo as a scorecard, with the reason for each point, marked for your team's review.

"We want to rank 20 to 100 candidates at a time."

DONE Every card shows its score and its rank on the search, so the order is visible at a glance.

"New candidates should be scored automatically."

DONE When someone is added to a chosen search, Weaver scores them within about a minute. Nobody has to ask.

THE PACKAGE

Everything you get

AUTOMATIC

Weaver scoring

Every candidate on your chosen searches is scored against the scorecard, ranked, and saved on the card in Loxo. New candidates too, by themselves.

ON DEMAND

Claude, connected to Loxo

Your team asks Claude about any candidate or search and gets the answer from your own Loxo: shortlists, call prep, client updates.

BEFORE LAUNCH

Full test on your searches

Every candidate on your open searches scored, with a summary and one report per search, before anything appears in Loxo.

LAUNCH DAY

Team walkthrough

30 minutes with your team, plus a one-page guide to reading the scores.

EVERY MONTH

Care and tuning

We watch costs and errors, tune the scoring to how your team judges, and add searches when you ask.

HOW IT WORKS

One pipeline, from your data to a decision

YOUR LOXO

Candidates

Work history, resume text and notes, on the searches you choose.

→ WEAVER

Prepares

Removes names, contact details and pay.

→ CLAUDE

Scores

Reads each candidate against the scorecard and explains every point.

→ WEAVER

Checks and ranks

Rejects incomplete answers, computes the average and rank.

→ YOUR LOXO

Scorecard on the card

Score, reasons, rank and questions for the call.

YOUR TEAM

Decides

Reviews the score, agrees or not, moves candidates on.

YOUR CLAUDE, CONNECTED TO LOXO

Answers on demand

Shortlists, call prep, client updates and database searches, using the same data and the scores Weaver wrote.

> **Your data stays yours.** It runs in accounts your firm owns, your candidates' details are not used to train AI models, and you can switch any part off at any time.

Your pipeline, with one extra line on each card

Nothing new to open. The score, the recommendation and the rank sit on every candidate, and each one opens into a full scorecard.

VP Sales · GovTech software, PE-backed · sample search

RANK 1 OF 8

Candidate B

4.3 Worth a call

Functional expertise	4
Scale and scope	4
Track record	4
Leadership	4
Stage and context	5
Market knowledge	4
Strategic judgement	4
Executive presence	5
Motivation and timing	5

Strong fit for a backed company in a growth phase, across new business and account growth. Communicates clearly.

Check on the call: sector is adjacent rather than identical.

1
Add candidates as usual
Nothing changes in Loxo.

2
Weaver scores them
In about a minute each.

3
The ranking appears
On every card.

4
Your team decides
Who to call, who moves on.

PART 2 · CLAUDE, CONNECTED TO LOXO

Ask anything about your candidates

We connect the Claude your team already uses to your Loxo, using Loxo's own official connection. Anyone on the team asks in plain English and gets answers from your real data, including Weaver's scores.

SHORTLIST

Top 3 on the GovTech VP Sales search, and why?

From the scores on this search:

1. **Candidate B** (4.3): fits a backed company in a growth phase. Check: sector is adjacent.
2. **Candidate A** (4.2): built a team through two funding rounds. Check: relocation.
3. **Candidate C** (3.8): large team, steady results. Check: comfort with less process.

CALL PREP

Prep my call with Candidate B in 5 lines.

1. Head of Revenue, PE-backed services firm; team of 22.
2. Grew revenue 2.3x in four years, selling to finance leaders.
3. Scored 4.3: strongest on stage fit and presence.
4. Open point: adjacent sector; ask how they would ramp.
5. Wants to move back into software, 60 days' notice.

CLIENT UPDATE

Draft this week's update for the client on the GovTech VP Sales search.

This week we reviewed 9 candidates against the agreed scorecard. Three stand out: a revenue leader from a PE-backed services firm in Arlington, a VP Sales who scaled a team through two funding rounds in Reston, and a regional director from a public software company in DC. First calls this week; short profiles by Friday.

DATABASE SEARCH

Who in our database could fit a CRO search for a PE-backed government services firm?

Searching your Loxo for revenue leaders in the DC region with PE-backed or public-sector experience:

1. **Candidate B**: Head of Revenue, Arlington.
2. **Candidate C**: Regional Sales Director, Washington DC.

Want me to add them to the CRO search so Weaver scores them?

THE SCORECARD

Nine questions every executive search asks

Ready to use. Change any of them and Weaver follows.

1–2 below the bar **3** meets **4** strong **5** exceptional No score when there is no evidence, instead of a guess.

Functional expertise Has led this function at this level.	**Scale and scope** Teams, budgets and revenue run, compared with the role.	**Track record** Specific, recent results, not job titles.
Leadership Built and developed strong teams.	**Stage and context** Has worked in a company like this one.	**Market knowledge** Knows the sector, customers and buyers.
Strategic judgement Has set direction and owned the outcome.	**Executive presence** Clear and credible with boards and CEOs.	**Motivation and timing** A real reason to move now; fits the role's location.

ALWAYS IMPROVING

It gets sharper every month

Learns your judgement
When your team disagrees with a score, we look at why and adjust.

Fits each search
A sharper scorecard for a CFO or a government-facing role than for VP Sales, when you want it.

Newest Claude, tested first
New models are compared on your searches before we switch.

A monthly note
What was scored, time saved, cost, and what we changed.

NEXT, WHENEVER YOU WANT IT

- Client-ready pipeline reports
- Past candidates matched to new searches
- A morning email with the day's best new candidates

RUNNING COSTS

What it costs to run, and who pays

Weaver runs in accounts your firm owns, so you pay the providers directly at their own prices, with no mark-up. Our fee for setup and monthly care is quoted separately.

ITEM	WHAT IT IS	PAID TO	PER MONTH
AI scoring	One Claude reading per candidate: about $0.05 to $0.14 each with Claude's top model, about half that with the lighter one if its scores are as good on your searches. Non-urgent runs go at half price.	Anthropic (Claude)	$30–80
Hosting	The small always-on service that runs Weaver, plus its hourly safety check, in a US East data center. The Pro plan lets us work in your account and comes with the provider's SOC 2 security report.	Render	$27–33
Loxo	Your current Loxo plan. Professional or above includes API access and the official Claude connection.	Loxo	no change
Claude for your team	The Claude your team already uses; the Loxo connection is free on your Loxo plan.	Anthropic	no change
Typical total at about 600 candidates a month			**$60 to $110**

AI cost scales with volume: about $10–25 for 200 candidates a month, $75–200 for 1,500. Estimates from the providers' published prices, October 2026; the full test measures your real figure before anything is switched on.

ONE-OFF

Full test on your searches	Every candidate on the searches you choose, scored once. Example: 10 searches of 50 candidates.	$25–70

NO SURPRISE BILLS

Spending limit

Set on your Anthropic account. It cannot be exceeded.

Daily cap

Weaver stops for the day at a set number of candidates.

Never twice

A candidate already scored on a search is never paid for again.

Cost shown first

Large runs show the count and the estimate before they start.

UNDER THE HOOD

Exactly what happens to each candidate

For you or anyone reviewing the setup. Every step uses the official connections of Loxo and Anthropic.

1	**Trigger**	Loxo tells Weaver the moment a candidate is added to a chosen search. An hourly check catches anything missed.
2	**Read from Loxo**	Weaver reads the candidate's profile, work history, latest resume text and notes through Loxo's API, about five requests per candidate. Read-only until you approve the test.
3	**Prepare**	Name, email, phone, address, pay and graduation years are removed. Long notes or resumes are trimmed, and the scorecard says so.
4	**Score with Claude**	One request to Claude per candidate, under your firm's Anthropic account. Claude must answer in a fixed format: a score and a reason per question, a recommendation, open questions.
5	**Check**	Weaver rejects any incomplete or out-of-range answer and asks again once. The average and rank are calculated by Weaver, not guessed by the AI.
6	**Write to Loxo**	One scorecard per candidate, marked as an AI assessment awaiting review. Nothing else in Loxo is changed.
7	**Your team**	Reads, agrees or not, decides. Claude connected to Loxo can then answer questions using the same scores.

> **Security.** Access keys live in the hosting provider's encrypted settings, never in documents or email. Anthropic does not train its models on data sent through its business API by default. Any access can be revoked at any time.

Included

- Weaver set up in your accounts
- The standard scorecard, adjusted to your feedback
- Full test on your searches with reports
- Claude connected to your Loxo
- Team walkthrough and one-page guide
- Monthly care, tuning and a monthly note

Not included, available later

- Client-ready pipeline reports
- Matching past candidates to new searches
- Morning email of the best new candidates
- Changes to your existing Claude prompts or report format

PEACE OF MIND

Built to be safe

Your team decides

Every score is a recommendation with its reasons. Nobody is moved or rejected automatically.

You approve first

We test on your real searches and show you the results before anything appears in Loxo.

Private

Runs in your firm's own accounts. Names, contact details and pay are never sent to the AI.

FROM YES TO LIVE

About two weeks, start to finish

Week 1

Connect and test

We connect to your Loxo, read-only, and score your open searches.

Week 1

You review

A summary plus one report per search. Tell us what to adjust.

Week 2

Switch on

Scores go into Loxo; new candidates are scored automatically.

Week 2

Your team

Claude connected to Loxo, 30-minute walkthrough, one-page guide.

TO START

Two things from you, the rest is on us

1. Access to your Loxo. We'll show you where to create it; it takes two minutes.
2. Which searches to test: all your open ones, or a few you pick.

Nothing changes in Loxo until you have seen the results and said yes.
